Download Livshelf Absolutely. VitalSource contains native applications for all the major platforms. The native app versions of Bookshelf allow you to download a single eBook or your entire library. Best of all with the native apps, you can read your ebooks anywhere, with or without internet access. To install Bookshelf: Go to www.vitalsource.com/download to download and install Books for your computer or mobile device. Sign in with your VitalSource email address and password. Once signed-in, download any of your eBooks to your device for use offline. What devices do you support? VitalSource Bookshelf is available on the following platforms: How many devices can I use? You can have up to two (2) mobile devices (iOS, Android, Kindle Fire, and Chromebook) and two (2) desktops (Mac and Windows) active at any given time. You can manage your activation through the Bookshelf app or by visiting the VitalSource Account Center. What if I miss heading out of my account? If you're missing titles, update your Library of Books. If you are still missing content after updating your library or have any issues downloading your eBooks, please contact VitalSource Support for additional assistance. Yes, Bookshelf for Mac and Windows offers a print function where users can select a set of pages for printing. The number of pages you can print will vary books in workbook. You can also print in a browser using Bookshelf Online. What if I need more help? If you need help getting started with VitalSource, our support team is ready to help you. Email us at support@vitalsource.com. You can also reach us at +1 (855) 200-4146, phone and email support are available 24/7. The main benefit of this app is that it is much more mobile than the website. However, this app is buggy and is missing some basic features that completely remove the mobile asset. They force you to frequently type your email and password just to use the app (there is no way to stay logged), and the IT function is agitated is terrible. The low quality of the voice on my device is understandable because they use your device's built-in expression engine, but don't set up the books to be read correctly by voice engine. Many words on the page are broken into individual letters, resulting in words being spelled one letter at a time. All footnotes are announced per page, so I hope you enjoy having your book cut out about once a minute to hear about all the legal restrictions on how you can use the book. On top of that, some of the skipped text and other texts that didn't even have before were added to. Divisions between chapters are not clearly highlighted, leaving you confused on the context. Why would I ever decide to use this app when I can use the bigger screen in one of many public computers that are increasingly available to everyone, or my laptop that is easy to carry anywhere? Bookshelf for Mac and PC *Note: Downloading your workbook from the server requires an active * Connection * You will need to download your eBook to one of our VitalSource Bookshelf eBooks to view on your computer. The file size of a textbook can range from a MB to some 1GB depending on the type of workbook, the size of the workbook, and the contents of the eBook. Once you have successfully downloaded the eBook to your computer, you don't need to be connected to the Internet to see it again. VitalSource Bookshelf can pose and summary downloads. Speeds for downloading a VitalSource eBook will vary based on the size of book and Internet connection.**You can purchase a VitalSource eBook from the VitalSource store or one of our partners. If you have a Code of Redemption, you will need to activate it before you can download your workbook. How to download your eBook: Downloading Your Workbook: Open Workbooks. The default view will be in the last Access workbook as the main view, or if you have never used BookShelf's last workbook added to your account. For the right to that main workbook covers, there is an icon that says Download Workbook or Open Workbook. If you hover over other overlay workbooks in My Workbook, you will see a Workbook download option; you will have an option to open Workbooks if already downloaded. Update your workbook list: Launch Book. When launched in Books, Bookshelf will check to see if there have been any changes in your workbook list if this has been made to Bookshelf wondering if you would like to update your book. Press the Update Now button to update your workbook. You can manually update your Workbook List by clicking on Update Library in the upper right of the Bookshelf pane. Help!
